PROGRAM SPOTLIGHT

With a variety of unique Career Education programs, students have the ability to gain a certificate and start in the career of their choice. Below are just a few highlighted programs available at local Los Angeles Region California community colleges.

Aviation Maintenance (West Los Angeles College)

Founded in 1974, the West Los Angeles College Aviation Maintenance Training program has provided students with the education they need to obtain their FAA license certificate. Students learn how to properly maintain aircraft and avionics equipment and learn the techniques to repair and perform scheduled maintenance on aircraft. Graduates have gone on to successfully obtain high paying aviation maintenance jobs throughout all levels of airlines and independent companies. The extraordinary team of Aviations instructors have a strong dedication to student success which has led students to winning awards at the annual national competition.

Horse Science (Los Angeles Pierce College)

The Horse Science program provides students with an in-depth course work and hands-on experience who wish to work in the horse industry. There are a variety of employment opportunities that can come from obtaining an Associate of Science degree in Horse Science including: stable/ranch management, horse training, veterinary assisting, riding instruction, event management and other horse industry related businesses. There is a strong emphasis on hands-on experience that includes horse care and breeding, handling, riding and training.
